GEOGRAPHY OF WASHING COUNTY.

Prepared for the Rene Board of Trade.] Washoo and Rosp counties being poses with no immediate or prospective probabilities of a divorce, we so considered, is bounded on the north by Oregon, on the cast by Humboldt, Storey and Lyon counties, on the south by Ormsby county, and on the west by the State of California, specially by the counties of Placer, Nevada, Sierra, Plumas torritorially larger than Delawara covered with pine and fir timber, the hills producing only juniper, sagebrush and bunch-grass. The plains and dry valleys are given over to sagobrush, gurn wood and jack rab bits, whilst in the valleys or such of them as are by nature supplied with water, abundant crops of wild grasses are produced, that makes a good smaller of hav the making and all the machinery that now is or and dry valleys are given over to quality of hay, the making and marketing of which was the sole business of the piencers of Washee County. The county is undoubtedly the best watered portion of the State persontage of families and permanents from 5,000 souls, probably a little ever with a large persontage of families and permanents from 5,000 souls, probably a little ever with a large persontage of families and permanents from 5,000 souls, probably a little ever with a large of Navada. The Truckee river, conneeting Tahoo and Pyramid lakes, with its tributaries, Mill, Franktown, Ophir, Steamboat, Evan's, Hanter's, Prosser and Dog creeks, carries more water and covers a farger area of torritory than all other water courses in the State combined. A portion of leke Tahne is in Washoo county, and having a world wide reputation requires no descriptions at rival interpretations no one can conour hands. Pyramid and Long lakes are entirely within our jurisdiction, Pyramid is about twenty-five miles in length by twolve to fifteen in width. Long Lake was originally but a slough, but through the changes wrought by many floods, has become second in size only to Pyramid; both are without outlets than such as are afforded by scepage and evaporation. There are on the mountain tops and in the valleys several small lukes or pends, the evaporation from which gives moisture to our dry atmosphere and modifies the intenso beat which would otherwise proclude the possibility of severe labor in our valleys. Of the climate we hardly know what to say, not that there is any question as to its valubrity, our remarkable exemption from infectious diseases and the readinous with which discuses

obanges to an extensive and constantly extending system of lerigation inaugurated within the last few yours the transformation of seemingly barron sagebrush plants into blossoming flolds and the planting of thousands of trees in all our valleys. At this writing the most important of agricultural products is hay - the production of which has been increased from less than five thousand tons in 1860 to thirty-five thousand tons in 1876, the larger percentage of the increase being alfalfa or chille glover, this species of alover is minpted to dry lands, standing surface water being cortain douth to the crop. The deep, gravelly soil of our sagebrush phins that absorb the water used for irrigation like a sponge, afford three crops a year and from two to three tons at each cutting where well seeded. The potate crop is the second in importance, excelling in quality and quantity; unfortunately the market is limited by the cost of transportation. All kinds of garden and field vogotables are produced in quantities limited only by the demand, and of a quality that cannot be excelled in any country. Coroals are cultivated only to a limited extout, for the reason that farmers in the immediate vicinity of the market find it to their interest to cultivate bulky crops, honce it is that the cul tivation of small grain is confined, in Winnemaca Valley, some forty miles from Virginia City, expects from forty to sixty bushels to the acro and is not disappointed. As settlements extend out from the contro increased attention will doubtiess be given to the cultivation of cereals. According to the most reliable estimates based on actual survey, our 2,272,000 neros are divided joined together by statutory enact-ment for judicial and revenue pur-ment for judicial and revenue pur-ment for judicial and revenue pur-timber lands, leaving nearly 2,000,000 timber lands, leaving nearly 2,000,000 neres minoral hands and rolling country that can only be utilized as cattle propose to consider and treat them in and sheep ranges. The claration of this article as one. Washoo county, Washoo county above the son level so varies in different localities that it is quite impossible to give even an approximate average. The Sammit, approximate average. The Sammit, east of Talice, is 7,810 feet above the sea level; Verdi, 4,895; Reno, 4,407; Wadsworth, 4,077. The last three are on the line of the C. P. R. R. and on the Truckee river. The mineral region of the county carries gold, and Modoc. Washoo has an area of silver, copper, iron, lead, cinnibar, 3,550 square tolles or 2,272,000 acres, sulphur, selt, borax, etc., etc. Our mining interests have herekefore tocerved but little attention, but willing and nearly twice as large as Rhode the fest two years an increased inter-Island. The surface of the county out has resulted in developments of a is diversified with mountains, hills, most premising character. The valleys and plains, the mountains Verdi and Rone, a distance of eleven miles, of 398 feet, or a little over thirty-six feet to the mile, we hardly know how to give a just idea of its size, Yon Schmidt estimates its flow

> PATRICIAL PROPERTY OF THE PARTY AN ENGLISH OPINION.

The London Times uses this fair language in reference to our Presidontial complication:

The technical controversies that are now the buttle ground of parties involve the most momentons political issues, and in the obscurity of fidently say that the law will be able to determine them clearly and limitly. to determine them clearly and matty. It is not denied, however, by anybody, that if such a determination were immediately possible, it would be received by the whole community with complete and loyal acquiescence. There is, moreover, a conviction among the Americans themselves, of which we can not analyze the dewhich we can not analyze the clemonts, but in which we are inclined to put faith, that at some time within the next three mouths a point will be reached at which logality will once more become clear to the perplexed mind of the nation. And, however disappointing the result so attained may be to the hopes of either party, there will be no resistance and parey, there will be no resistance and little marmaring. A month after the inauguration of the new Presi-dent, whomseever he may be, the currents of American politics will probably have returned to their wonted channels and the froth of the prosent excitement will have disup

THE ALTAR.

50 CENTS ON THE DOLLAR. FIFTY CENTS ON THE DOLLAR. -Although Messrs. Grey & Isanes are solling off their choice stock of Winter dry goods, etc., etc., at the above rate, people must not infer that they have compromised with their creditors. Not by any means. Socing Grey & Isanes have establishod for themselves an A No. 1 credit with the wholesale importers in the country, and why? Because they meet their payments promptly, and pay 100 conts on the dollar every time. However, when opportunity offers, wherein they can buy desirabla goods at a sacrifice, they take advanlage of the same and give their patrons the full bensits. They do not by any mones extert the full 100 cents on the dollar. Nor yet do they preach what they full to practice. No hypocrisy. No monopoly. No misrepresentation, with Grey & Isanes; but honor, fair dealing and truthfulness is their policy. People of Rono! we stand by our past record and leave it to a wise and intelligent community to decide whother we have brought down the prices or not, as well as having established for ourwell as having established for our- in Cooker Building not is new prepared to do solves a reputation which will be hard all work in his line precipity and satisficationly. for our opponents to effice. THE HANDSOME TRING FOR THE Obritans.--The Carson Appeal of bunday tells how handsomaly the Stato's children ware provided for on

We had a short jorky interview with Parson Kelly yesterday about the Orphan's Home contributions of the Orphan's Home contributions of money and gifts. He says that in addition to the \$227 contributed here, the citizens of Virginia City gave \$150 worth of books, and that he received yesterday from Euroka a check for \$75. This makes a total of more than \$150, and thapire and the cow countries yet to hear from. This showing is in proof that these sage brashors take good and substantial care of their orphans. They will have a gorgeous tree, or trees, rather, to they will be in the plural and tor they will be in the plural and laden with the best and most plenteous and most somounble of fruits.

A Phountan Ummeen. -The ground is as dry and the reads are as dusty at present as at any time during the Summer. Yourly two months has chapsed since the last shower of rain. The days are pleasant and warm for this season of the year, but the nights are invariably cold—Lee from light to lee inches thick has formed on to in theses their has formed on the slonghs, though the river in many pluses is not frezen over. Those having iso houses are now fill-ing them with crystal blocks for next Dummer's ma, and to-day we saw John Jurgen's team londed with 1co enveloped in a cloud of dust, bethe river and his ice house. This is a sight portupes never seen clowhere than in Novada, as in other countries in the middle of the Winter, during the ice larvest serson, the ground is govered with snew or slush—Wancomacca Silver State, the wild

MINING MACHINERY FOR BELMONE. There are four cars and a cago at the Depat for the Belmont mine, Myo county. This would seem to indicate that the Bolmont contemplates a more vigorous presecution of operations; indeed we are told that the mine is looking splendidly, as is also the FR Dorado South. Both have fine ore bodies in sight, as we learn from gentlemen from Nye county, and the supposition new is that both will shortly be yielding large amounts of builton,—Faraka Boutinet.

A CALD - Plotton Journal For the benefit of those among us who are saffering from Chronic Nasal Catarrh and who may have been erroneously led to believe that their affliction is incurable, and also as a slight appreliation of the skillful treatment received at the hands of a worthy phy-Eistan now with us, I will atato that about eight years ago I contracted a very severe cold, which in spite of all my endoavers, settled in my head and throat, affecting the bronchial tubes to such an extant as to reader; mo at times unable to speak above a whisper. In this condition, after consulting eminant practitionors, including Drs. Tohand of San Francisco and Citness of Sacramento, who advised a change of climate. I loft San Francisco and located in Bena. The transition from the ofttimes damp, cold and foggy atmosphere of the Golden City to the vigorous and bracing air of Nevada was immediately felt. With the aid of treatment which I brought with mo namaged to hold the trouble in

check, although without the slightest hope of a final cure. Five months ago I was induced to take a course of treatment from Dr. R. H. Chase, and with anexpected success. In a short time the chronic cateril and throat trouble which had resulted from it, entirely disappeared, and I find myself permanently cured.
